Seller Promotion – Adding Products Based on Parent SKU/Config SKU

Overview

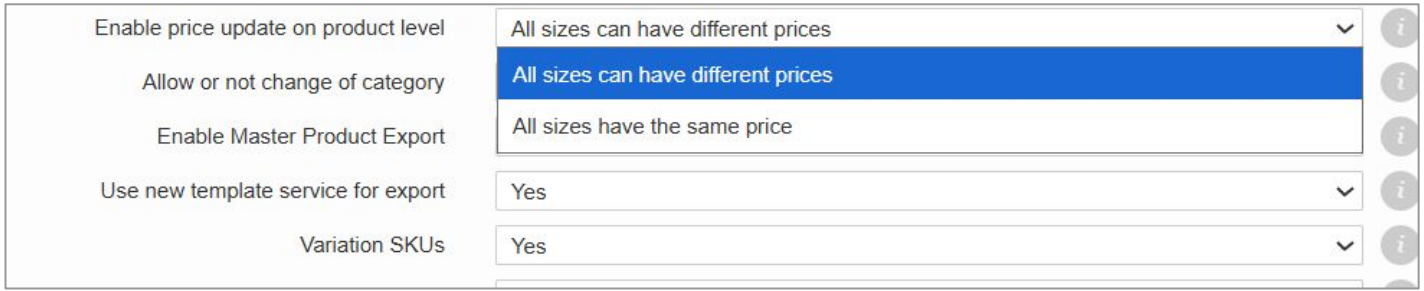

An enhancement has been made to the Seller Center promotion module, allowing sellers to upload SKUs to a promotion at the ***Parent SKU/Config*** SKU level (previously, this was done at the individual product size variant level). This improvement aims to reduce the workload when sellers are uploading a large number of SKUs.

FEATURE SCOPE

- The Config SKU import and export feature is available for all promotion types, including ZALORA Promotions, Seller Promotions, Cart Rules, and Discount Promotions. It is also available to sellers using the API.
- Promotion criteria must apply to all product variants.

Seller Promotion – Adding Products Based on Parent SKU/Config SKU

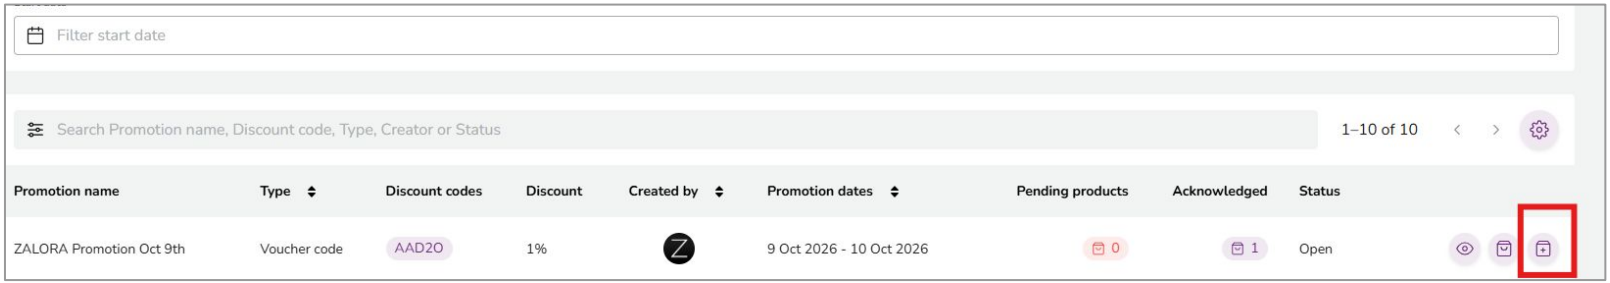

For **Discount Promotions**, the import/export option at the **Config SKU/Parent SKU** level is available only when product pricing is set to “All sizes have the same price.”
