

LENDINGKART

Think Cash, Think Lendingkart!

Interest Rate Model Policy

This policy is intended to be representative of Lendingkart Finance Limited ('LFL' or 'the Company') guiding philosophy of dealing with customers in a transparent and an open manner. Though interest rates are not regulated by the Reserve Bank of India ('RBI'), rates of interest beyond a certain level and not commensurate to the risks undertaken for the particular transaction may be seen to be excessive and can neither be sustainable nor be conforming to normal financial practice. Thus, in accordance with the RBI Guidelines on Fair Practices Code for NBFCs (under the Master Direction - Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016), LFL has documented Interest Rate Policy / Model approved by the Board of Directors which lays down internal principles and procedures in determining interest rates and other charges on the loan products offered by LFL.

In compliance with the said Master Directions, the Interest rate model for the Company is given below:

Methodology of Arriving at Interest rate for Loans and Approach for Gradation of Risk:

- The company (LFL) has its own model for arriving at lending interest rates taking into consideration of weighted average cost of borrowed funds, matching tenor cost, market liquidity, cost of customer acquisition, cost of underwriting, interest rate risk, credit and default risk in the related business segment, historical performance of similar homogeneous clients, profile of the borrower, tenure of relationship with the borrower, repayment track record of the borrower in case of existing customer, deviations permitted, future potential, overall customer yield etc. Such information is gathered based on the information provided by the borrower, credit reports, data sources and market intelligence.
- Cost of un-allocable overheads and other administrative costs and margin is added to arrive at the final lending rate.
- The weighted average cost of funds is computed considering the cost of the company (LFL) aggregate borrowings at the month end from various sources such as term loans, bank lines, NBFC lines, non-convertible debentures, etc.
- The rate of interest for the same product and tenor availed during the same period by different customers need not be standardized. It could vary for different customers depending upon consideration of any or combination of above factors.
- The interest rates could be offered on fixed or variable basis and charged on flat or reducing balance method.
- The interest could be charged on weekly, biweekly, monthly or quarterly rests for different products / segments.

- The interest shall be deemed payable immediately on the due date as communicated and no grace period for payment of interest is allowed.
- Besides normal interest, the company may levy additional / penal interest for delay or default in making payments of any dues. These additional or penal interests for different products or facilities would be decided by the respective business / product heads.
- Besides interest, other financial charges like processing fees, origination fees, cheque bouncing charges, cheque swap charges, late payment charges, legal charges, pre-payment / foreclosure charges, NOC issuance charges, SOA charges etc., would be levied by the company wherever considered necessary. Besides these charges, stamp duty, documentation charges, GST and other cess would be collected at an applicable rate from time to time, as communicated in the documentation provided. Any revision in these charges would have a prospective effect and will be communicated to the borrower.
- While deciding the charges, the practices followed by the competitors in the market would also be taken into consideration.
- Claims for refund or waiver of charges / penal interest / additional interest would normally not be entertained by the company and it is at the sole discretion of the company to deal with such requests. Genuine refund claims are processed by the company and any additional amount received in addition of due amount is refunded to the borrowers.

Rate of interest:

- The Company intimates the borrower: the loan amount, rate of interest, tenure, amount of equated monthly installment at the time of sanction of the loan.

Asset Liability Management Committee (ALCO)

- The rates of interest shall be reviewed periodically and any revision in this policy shall be decided by ALCO and shall, subsequently, be presented to the Board of Directors of the company (LFL) for its approval.
