

# SET UP INSTRUCTIONS

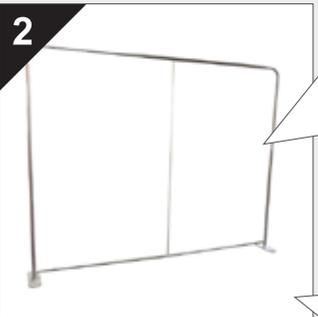

Set up time: Under 5-10 mins

## Pillow Case Fabric Displays

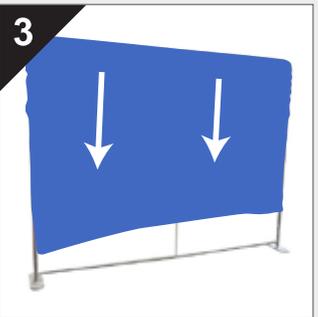

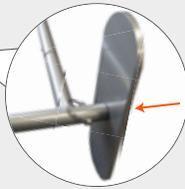

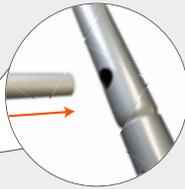

paperlust  
PRINT SHOP

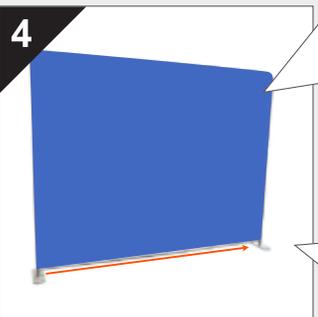

Straighten and assemble the bungied poles. Each pole will be labeled from both ends. Clip in the poles with the matching labels together.

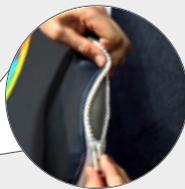

Install the center pole in the holes. The expandable pole clicks in from the top and the bottom in the assembled frame. You can then attach the feet to the bottom of the frame which can be secured with the locking pins.

Once the frame has been set up, slide the fabric skin on top.

You can now secure the skin by fastening the zip along the bottom.

Clip on the lights to the top of the slimline wall.

Your media wall is now ready!

## How to collapse the unit?

1. Unzip the fabric from the frame.
2. Release the tubes from one another and safely place back into the carry case.

## Safety notes:

1. Please store the printed skin in a cool and dry place to retain the print quality.
2. DO NOT bleach the fabric. You can only handwash or machine wash the fabric.
3. Always stretch out the fabric on the frame to dry after washing.
