

WHAT CAN WE LEARN FROM VAS'S MODERNIZED EDUCATIONAL MODEL?

After 15 years of operations, with 8 campuses in Ho Chi Minh City, more than 8,500 students enrolled from kindergarten to high school level, Vietnam Australia International School (VAS) is considered a role model for education, setting new standards for International Bilingual Education. Which factors have helped VAS become one of the trustworthy largest-scale education schools that continuously receive investment funding to expand even further?

Leader's vision, school's mission

VAS's Vision and Mission are based on the trust that education's common goal is to bring satisfaction and opportunities to families. Therefore, the biggest motivation of the VAS team, with an enormous commitment to education, can be clearly seen through students' improvement, growth and maturity in their own ways, aligned with the core values. The direction towards organizational development and students' education are set by a team whose minds are open and that seek out all positive changes and trends from the industry around the world.

There are annual school activities to help students improve their skills and talents; from programmes to inspire students to educational seminars, and a modernized system which enhances the quality and management of study, and communication between parents and teachers.

Standardizing education programmes through each developmental phase

Thanks to the business acumen of our Founders, Boards of Management, popular international programmes in developed countries are now being offered at Vietnam Australia International School. The combination of high-quality education and student care services has attracted many families since VAS was founded. Parents really feel more assured when creative and effective International Bilingual Education Programmes and Extra-Curriculum Programmes are offered at VAS.

At any stage, these education programmes at VAS meet the international standards; from the textbooks, reference materials, facilities serving teaching and learning purposes, to the professional skills of the faculty and other supporting activities with an aim to help students improve further each day.

Investment in human development in management and education

VAS never shies away from having the most experienced international educators come to Vietnam to improve teaching and learning across all campuses, and to achieve a high professional quality, upgrade the operations systems, as well as to research and develop educational programmes. As a result, VAS has gradually become the learning environment of the future, where VAS students can develop their personal values, reduce stresses from learning, and prepare themselves with necessary skills to expand their academic horizons and to pursue a career in many developed countries around the world.

Balance between business profits and educational goals

Just like other International Schools with foreign investment, VAS runs the business side of education with clear objectives and key performance indicators. However, investors are completely committed to re-investing in educational programmes, faculty and staff, and the expansion of more campuses in order to bring VAS's advanced educational programmes to even more families in Ho Chi Minh City, as well as other locations.

With the benefits of students and parents being prioritized, the learning environment of VAS is always chosen by the team itself including, the management board and faculty for their own children. The human aspect in running a business the likes of VAS is also a key factor helping the organization earn the strong support of parents.

VAS Information:

Vietnam Australia International School (VAS) founded in 2004, currently the only organization providing complete learning pathway suitable for each student's demand:

- Pathway 1: Cambridge 100% International Education Programme (Grade 9-12)
- Pathway 2: Cambridge International Education Programme, combining with National Educational Programme.
- Pathway 3: Cambridge Advanced English Programme, combining with National Educational Programme.

Students enrolling in Cambridge International Education Programme (Pathway 1 & 2) will graduate with a Cambridge IGCSE and AS & A-Level, given by Cambridge Assessment Council. The Qualification is recognized worldwide and is also a passing ticket for students who wish to apply for top Universities in countries such as the UK, USA, Australia, Canada, Singapore, the Netherlands, and New Zealand... Many American Universities have given credits for first year's subjects to students who achieved good results in A-Level programme.
