ELLE RESORT - INTERIOR

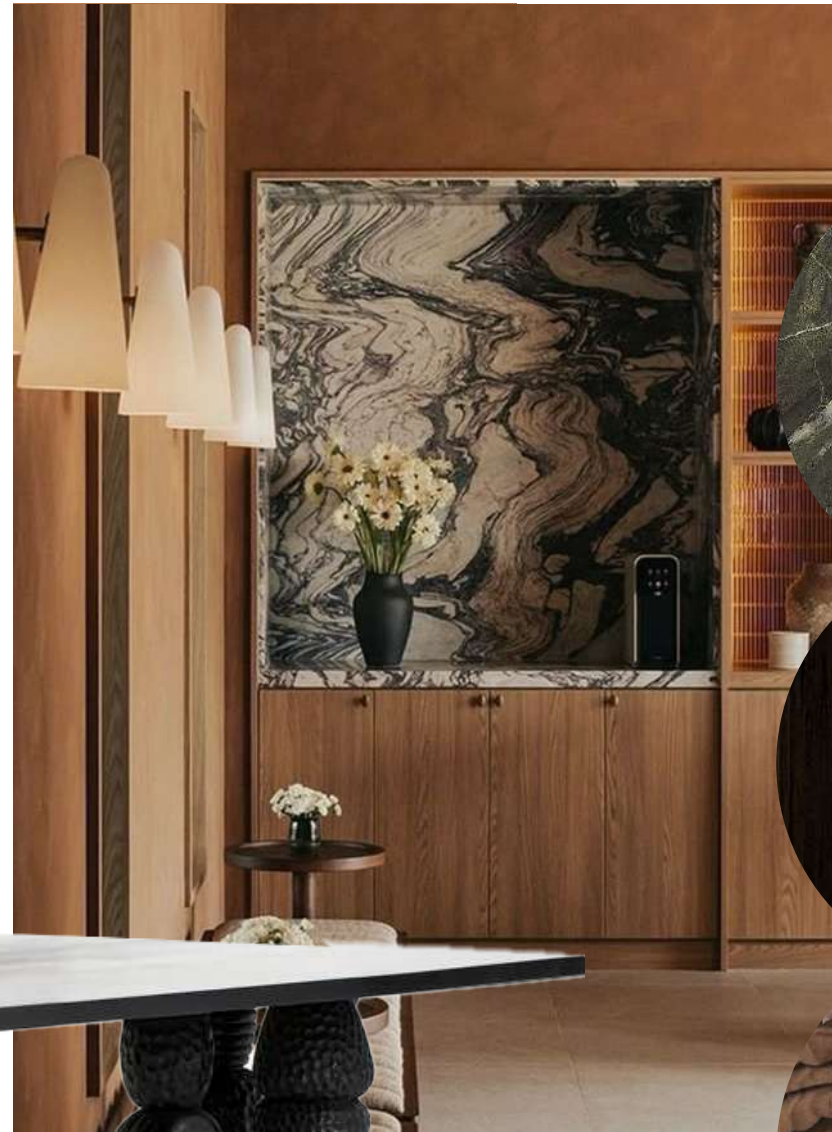

Approached as a work of art, the space is defined by a thoughtful balance of saturated colour and materiality, guided by a curated interplay of palette, form, and texture.

A bold mix of sculptural furniture and layered finishes sits against a muted base, allowing the art to anchor the interior.

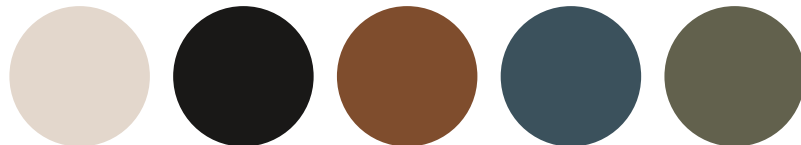

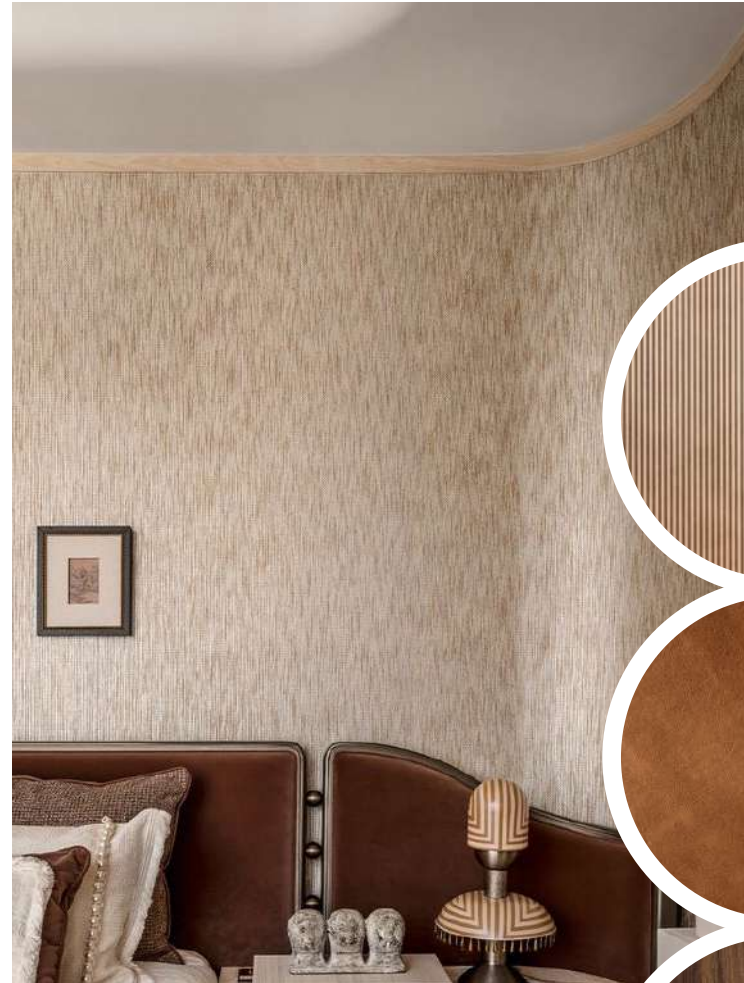

a fusion of expressive, art-driven aesthetics with the kind of understated polish that feels inherently Elle: modern, fearless, and designed to be felt as much as seen.

Playful yet refined colours and materials thoughtfully layered to introduce a subtle play of texture and tone. Selecting glossy finishes gives gentle points of reflection, bringing a quiet balance to the otherwise unique palette.

Detailed crafted artworks applied throughout the interior, giving nuanced layers of material and cultural detail that enrich the spatial narrative

The bedroom balances warm tones with eclectic colors and patterns. Velvet upholstery extends across the walls, adding texture and softness. Polished brass details sit alongside matte surfaces creating a layered contrast that unifies the design. Sculptural art pieces are placed in every corner of the space.

Featuring a mix of eclectic colors where shifts in tone and texture create a layered, expressive surface. Sculptural brass fixtures bring in contrast and depth while the soft, rounded edges shape the space with a sense of flow.
