

## MS ABIRAMI RATNAKUMAR

*Abirami Ratnakumar is a Senior Resource Efficient Cleaner Production (RECP) Expert at the National Cleaner Production Centre, Sri Lanka. She holds an M.Sc. in Materials Science from the University of Moratuwa, a Master's in Environmental Management from the University of Colombo, and is a Graduate Chemist from the Institute of Chemistry, Ceylon. With a decade of experience in chemical safety, circular economy, and sustainable materials innovation, she has contributed to high-impact national and international projects in collaboration with UNEP, UNIDO, and other multilateral agencies. Her current work focuses on promoting circular economy practices across industrial sectors through technical advisory and training. A published scientific author, Abirami continues to lead and support projects in environmental sustainability, chemical management, and resource efficiency.*
