

Access UBS POS January 2026 Release Note

About these Release Notes

Welcome to the Access UBS POS Release Notes!

This document provides all essential information about the current software version. It includes a summary of the changes made, and you can navigate through the document easily using the hyperlinks to access detailed information about the new features, including relevant screenshots and videos where applicable.

Please refer to the table of contents for a full list of what is included.

About Access UBS POS

Access UBS POS is a point-of-sale cash register for retail sales, services, and rental businesses. This system can operate with or without barcode scanning equipment. Product codes can be manually entered or scanned during a transaction, instantly displaying the item's quantity, price, and description on the screen for quick and accurate processing.

Integration is allowed between Access UBS POS and Access UBS Accounting & Billing.

Release Summary

Access UBS POS v2026.0

Important Note:

- You will need to disable your Anti-virus before you install the new update as some Anti-virus can interfere and prevent a successful installation.
- After successfully installing the update (whether via Online Update or using the Installer), you must restart your computer for the configuration changes to take effect.

The major features included in this release are listed below. For more information about each feature, please click the corresponding links. Features are grouped by Product/Area to help you quickly find the details most relevant to your needs.

General

S-Code (subscription) License

This release introduces the S-Code subscription licensing model for Access UBS POS. This transition from perpetual licensing to annual subscription ensures continued access to product updates and support.

Key behaviors:

- Users with expired S-Code licenses can access POS in view-only mode with report access only
- Users cannot access versions prior to v2026.0 after S-Code license expiry
- Perpetual license users remain unchanged

Release Contents

The following section provides detailed descriptions of features, including screenshots and videos where applicable. This is organized based on the products and modules identified in the Release Summary section.

General

S-Code (subscription) License

Access UBS POS v2026.0 introduces the S-Code subscription licensing model, transitioning from perpetual licensing to an annual subscription model. This ensures customers receive continuous product improvements, regulatory updates, and technical support.

Key Features:

License Acknowledgement

- Before activating the S-Code license, users must acknowledge and agree to the subscription licensing terms
- Clear messaging about the transition to subscription-based licensing

Expired License Behavior

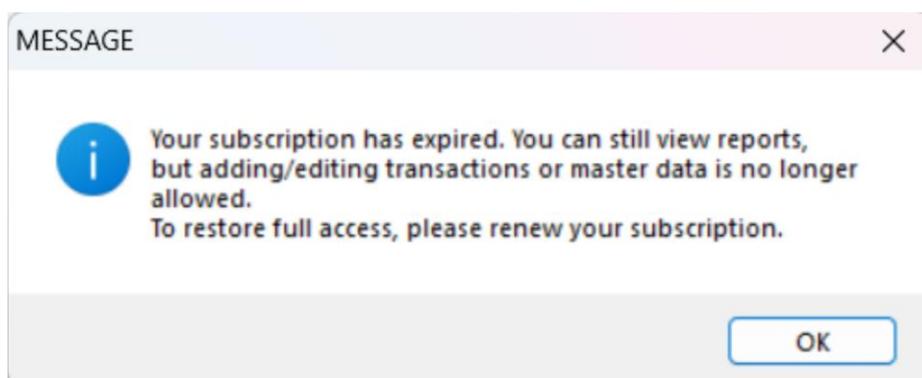

- After S-Code license expiry, users cannot access versions prior to v2026.0
- View-only mode available from v2026.0 onwards with report access only (S-Code license)
- Perpetual license customers remain unaffected by these changes

Version Access Control

- Users with expired S-Code licenses cannot launch or access non-S-Code builds dated before December 31, 2025
- System validates license status on application launch

Important Notes:

- This change applies only to customers using S-Code subscription licenses
- Existing perpetual license holders can continue using their licenses as before
- Contact your Account Manager for questions about license transitions

Digital Assistant

The Access UBS Digital Assistant and Help Centre are now in one place; visit [HERE](#). The new UBS Help Centre has smarter search and navigation, sleek user-friendly design, and quick access to resources, including a curated collection for Year-end processing [HERE](#) to assist you with a smooth transition to the new year. Read more about how to **Navigate the new Help Centre** [HERE](#) and maximise your use of the **Digital Assistant** [HERE](#) to get answers to your questions faster.

This update applies across all Access UBS products where the Digital Assistant is available.

Issue Resolutions

Here is the summary of the concerns that haven addressed:

- Fixed an issue where error prompts, "Error 1441" Class cannot be instantiated, when opening company send method in eInvoicing configuration.
