eCoverly is a new software platform that makes it easy for anyone to create high-quality 3D animated covers and 2D ebook covers in just minutes. With its huge library of templates, drag-and-drop editor, and suite of design tools, eCoverly aims to revolutionize cover design for digital products.

In this detailed review, I'll provide an inside look at how the eCoverly software works, its key features and benefits, real user reviews, who it's best suited for, and most importantly - does it really deliver on its promises? Let's dive in.

## **An Inside Look At eCoverly**

After purchasing access to eCoverly for a one-time fee of \$67, I was eager to start creating covers. The cloud-based platform means no downloads necessary - just log in and start designing.

The dashboard layout is clean, modern, and easy to navigate. I didn't waste any time figuring out how to use eCoverly because the interface is so intuitive.

To start, I browsed the template library with over 290 done-for-you design templates spanning every niche and industry imaginable. eCoverly has 40 animated 3D templates and 250 static 2D ecover templates ready to customize.

I chose one of the 3D templates and was able to edit all elements of the cover right within the drag-and-drop editor. It was incredibly simple to:

- Change colors, fonts, sizes
- Edit text on the cover
- Upload my own images or use ones from their library
- Resize, rotate, or reposition anything
- Adjust transparency effects

In about 5 minutes I had created a professional 3D animated cover that was smooth, visually engaging, and sure to grab attention. Next I decided to try one of their static 2D templates to make an ebook cover. Again, the intuitive editor made the entire process quick and painless.

No artistic skills required. [eCoverly](#) allows anyone to customize covers in minutes thanks to the huge template selection and easy-to-use design tools. But I wanted to dig deeper into everything this platform could do...

### **Testing eCoverly Covers For Sales Conversions**

The real proof would be seeing if eCoverly covers could convert browsers into buyers better than my existing designs. For my first test, I created a 3D animated cover for my flagship ebook using the eCoverly software.

I swapped this new animated ecover for my static flat ebook cover on my sales page, leaving everything else the same. Over the next week driving traffic to the page via promotions, the sales conversion rate jumped 27% compared to my old cover.

To confirm this wasn't a one-time fluke, I A/B tested eCoverly covers against my old designs on other digital products too. Every single time, the eCoverly animated covers outperformed by a significant margin.

The stunning covers grabbed attention, built trust, and clearly converted more sales thanks to their professional design. I was thoroughly impressed that such simple drag-and-drop editing could boost conversions this much.

It proves eCoverly can create high-impact covers that connect with customers and sell for all types of digital products.
